

## Setting up Tanium Collector

<https://campus.barracuda.com/doc/101056843/>

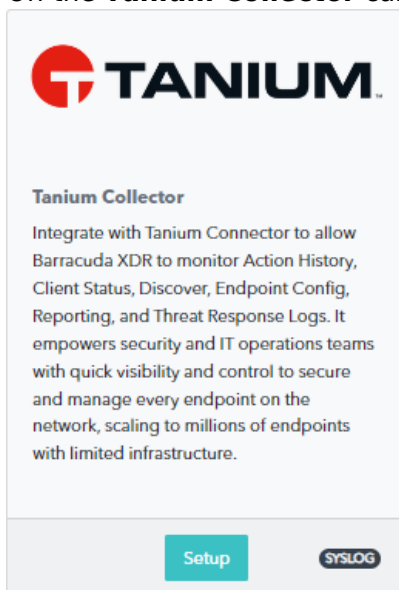

This setup is for the XDR Collector only. If you are using a physical or virtual sensor, refer to [Integrating Tanium Connect](#).

To set up Tanium Collector, do the following:

- **Enable Tanium Collector**
- **Install the XDR Collector**

### Enable Tanium Collector

1. In **Barracuda XDR Dashboard**, navigate to **Administration > Integrations**.
2. On the **Tanium Collector** card, click **Setup**.

3. Select the **Enable** check box.

4. Click **Save**.

---

## Install the XDR Collector

---

When collecting logs from one or more integrated data sources, always set up the XDR Collector on a dedicated host server. Don't use an existing server because the amount of data produced by logs can impact critical infrastructure.

- If you haven't already set up the XDR Collector, do one of the following:
  - [Setting up the XDR Collector for Linux](#)
  - [Setting up the XDR Collector for Windows](#)
