Integrating Barracuda IDS Collector

https://campus.barracuda.com/doc/101712415/

> This setup is for the XDR Collector only. If you are using a physical or virtual sensor, refer to
> Integrating Barracuda IDS.

To set up a Barracuda IDS Collector, do the following:

- **Enable Barracuda IDS Collector**
- **Install the XDR Collector**

Enable Barracuda IDS Collector

1. In **Barracuda XDR Dashboard**, navigate to **Administration** > **Integrations**.
2. On the **Barracuda IDS Collector** card, click **Setup**.

3. Select the **Enabled** check box.

4. Click **Save**.

Install the XDR Collector

When collecting logs from one or more applications, always set up the XDR Collector on a dedicated host server. Don't use an existing server because the amount of data produced by logs can impact critical infrastructure.

- If you haven't already set up the XDR Collector, do one of the following:
  - [Setting up the XDR Collector for Barracuda IDS for Windows](#)
  - [Setting up the XDR Collector for Barracuda IDS for Linux](#)
