

## Setting a Threshold for Log Degradation

<https://campus.barracuda.com/doc/101713159/>

Log degradation occurs when the communication between the log and the device is interrupted. The Log Degradation Threshold is the amount of time that communication is interrupted before you receive an alarm.

### To set a log degradation threshold for a device

1. In Barracuda XDR Dashboard, click **Infrastructure > Endpoint Devices**.
2. In the **Endpoint Devices** table, click the row of the device you want to set a threshold for.
3. Select one of the following:
  - **1 Day**
  - **3 Weeks**
  - **6 Months**
  - **1 Year**
4. Click the x icon .
