

Barracuda XDR Release Notes — November 2023

<https://campus.barracuda.com/doc/102888015/>

Automated Remediation for Barracuda CloudGen Firewall

Known, active threats are now automatically remediated for Barracuda CloudGen Firewall. This saves time and money and frees human efforts to focus on other tasks.

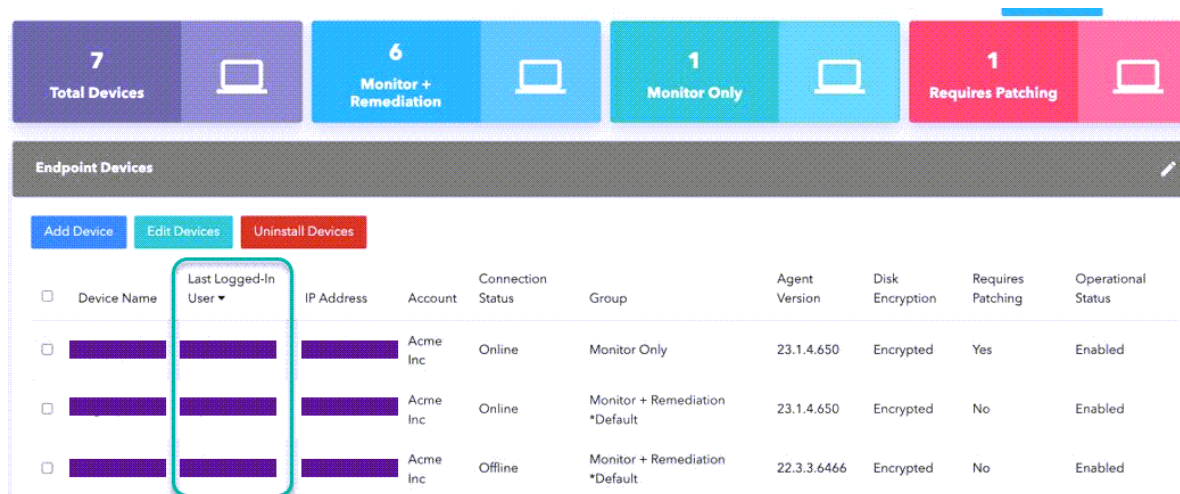

When an alert is triggered, the SOAR platform determines whether the IP address is malicious or not. If SOAR determines that it is malicious, the IP address is automatically added to the Barracuda CloudGen Firewall block list.

Managed Endpoint Security Enhancements

A new group has been added for Managed Endpoint Security customers, **Monitor + Remediation + USB allowed**. This group includes the features of the **Monitor + Remediation** group, but allows USB connectivity by default.

New Column Added to the Infrastructure > Endpoint Devices Page

To help troubleshoot issues, the **Last Logged-In User** column has been added to the **Infrastructure > Endpoint Devices** page. This column displays the User ID of the last user who was logged in to the device.

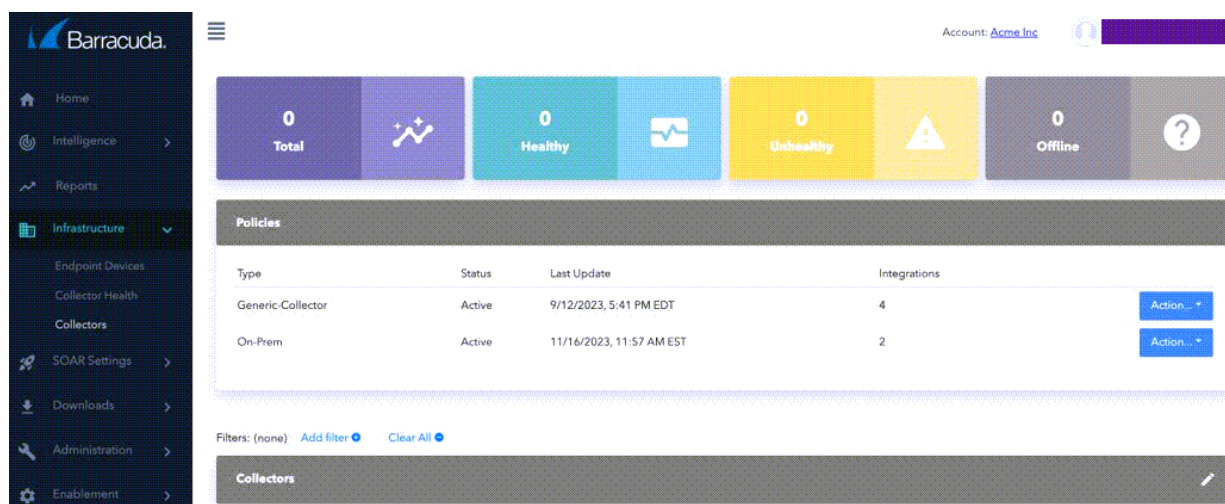

<input type="checkbox"/>	Device Name	Last Logged-In User	IP Address	Account	Connection Status	Group	Agent Version	Disk Encryption	Requires Patching	Operational Status
<input type="checkbox"/>				Acme Inc	Online	Monitor Only	23.1.4.650	Encrypted	Yes	Enabled
<input type="checkbox"/>				Acme Inc	Online	Monitor + Remediation *Default	23.1.4.650	Encrypted	No	Enabled
<input type="checkbox"/>				Acme Inc	Offline	Monitor + Remediation *Default	22.3.3.6466	Encrypted	No	Enabled

Barracuda XDR Collectors for Windows Added

Barracuda XDR Collectors are the new way data will be gathered on-premise, starting with the new Windows collector.

A new page is available at **Infrastructure > Collectors**. This page lists every collector that has been deployed, as well as the status, the last update, and the number of integrations for that collector. This page is a central location so you can easily and quickly manage and maintain the collectors that support Barracuda XDR services.

Improvements to Autotask Setup

You can now map companies in Autotask, letting you categorize information so it is more readable.

Improvements to ConnectWise Ticket Integration

ConnectWise tickets integration status is now displayed under **Administration > Integrations > ConnectWise**.

Improvements to Ticket Integration

Tickets are now more closely synced with the partner's internal notes.

Device Log Degradation Wording Changes

For clarity, the wording for device log degradation has been changed.
