

Event Log Messages

<https://campus.barracuda.com/doc/104367909/>

The following is the list of event log messages:

- **Event Type** - The event type generated for the respective component.
- **Event Message** - The message displayed for the generated event.
- **Log Type** - The type of log for the event.

| Event Type | Log Type | Event Message |
|----------------------|-----------------------|--|
| Server Health | | |
| Server Health | ServerUp | Server {ip}:{port} is now Up from all datacenters; traffic will be routed to it normally. |
| Server Health | ServerDown | Server {ip}:{port} is Down from at least one datacenter; traffic will be routed to other servers if they are defined, or will fail if not. |
| Server Health | ServerHealthChecksOff | Server {ip}:{port} has its health checks off. |
| Server Health | ServerHealthChecksOn | Server {ip}:{port} has its health checks on. |
| Server Health | ServerStatus | <ul style="list-style-type: none"> • Server {server_name}: Status Up, out of band monitor • Server {server_name}: Status Down, Reason: TCP connection timed out error • Server {server_name}: Status Down, Reason: TCP connection Refused error • Server {server_name}: Status Down, Reason: HTTP response status code mismatch • Server {server_name}: Status Down, Reason: HTTP response content mismatch |
| DDoS | | |
| DDoS | DDoSWarTransition | Your application, {ms_name}, is under DDoS attack. Mitigations have been deployed for the attacks seen and will continue until the attack has stopped. |

| | | |
|--------------------|---|---|
| DDoS | DDoSPeaceTransition | Your application, {ms_name}, is no longer under DDoS attack. Mitigations have been stopped. |
| Certificate | | |
| Certificate | CertificateIssueRenewalSuccess | The certificate for your application has been successfully issued or renewed. The certificate's expiration date is {date} |
| Certificate | CertificateIssueRenewalFailure | The certificate for your application could not be issued or renewed due to the following error: {error} |
| Certificate | CertificateAutomaticExpirationWarningDnsRecordError | The automatic certificate for your endpoint {ip}:{port} could not be renewed because your DNS records are not correct. The certificate will expire in {days} days. Fix your DNS records, or upload a new certificate, within {days} days to prevent application downtime. |
| Certificate | CertificateAutomaticExpirationWarningGlobalError | The automatic certificate for your endpoint {ip}:{port} could not be renewed. The certificate will expire in {days} days. Contact Barracuda Support for assistance. |
| Certificate | CertificateManualExpirationWarning | The certificate for your endpoint {ip}:{port} is expiring soon, in {days} days. Upload a new, updated certificate, or switch to automatic certificates to have WAF-as-a-Service automatically obtain and renew your certificates. |
| Certificate | CertificateCdnExpirationWarning | The certificate for your endpoint {hostname} will expire soon, in {days} days. Upload a new certificate. Alternatively, switch to CDN Managed certificates to enable WAF-as-a-Service to obtain and renew the certificate. |
| License | | |

| | | |
|---------|----------------------------|--|
| License | LicenseViolationResolved | All license violations were resolved. |
| License | LicenseViolationInProgress | License violation - check your WaaS account for more details |
