Exporting the Endpoint Devices Table

https://campus.barracuda.com/doc/104371353/

You can export the contents of the **Endpoint Devices** table so that you can easily report on the endpoints you are monitoring.

The file is saved in your **Downloads** folder as a **Comma Separated Values** (CSV) file.

The exported file contains additional information not shown in the **Endpoint Devices** table. The information included is:
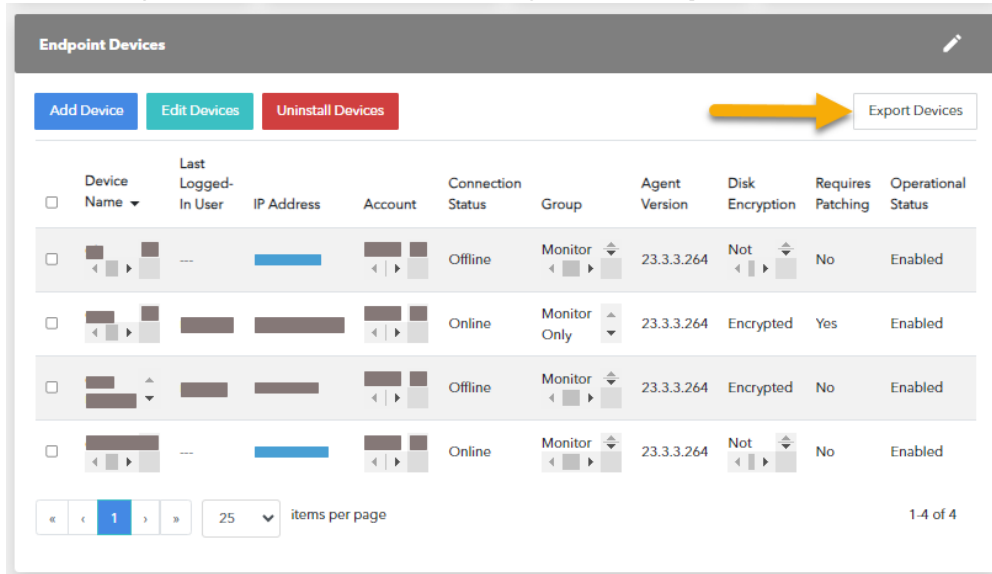

- **ID** - Displays the device's identification number.
- **Agent Version** - Displays the version number of the XDR agent on the device.
- **Requires Patching** - Indicates if the device has an application that requires a patch or is up to date.
- **Device Name** - Displays the name of the device.
- **Core Count** - Displays the number of cores on the device.
- **CPU Count** - Displays the number of CPUs on the device.
- **CPU Type** - Displays the type of the device's CPU.
- **Disk Encryption** - Indicates if the device's disks are encrypted using BitLocker. 1 for encrypted, empty for not encrypted. (Third-party encryption tools such as ESET or Dell DDP are not reported.)
- **Group ID** - Displays the ID of the group the device belongs to.
- **Group** - Displays which group the device belongs to.
- **Connection Status** - Displays the device's connection status. 1 for online, empty for offline.
- **Last Active** - Displays the date and time the device was last active.
- **IP Address** - Displays the IP address of the device.
- **Last Logged-In User** - Displays the ID of the user who logged in to the device most recently.
- **Device Type** - Displays the device's type.
- **Model** - Displays the model of the device.
- **Network Interfaces** - Displays the device's network interfaces.
- **Operational Status** - Indicates if the Barracuda XDR SentinelOne agent is enabled or disabled.
- **Snooze Expiration** - If a device is currently snoozed, displays the date and time the device will begin to detect threats again.
- **OS Version** - Displays the version of the device's OS.
- **OS Type** - Displays the type of the device's OS.
- **Registered** - Displays the date and time the Barracuda XDR SentinelOne agent was installed on the device.
- **Scan Status** - Indicates if the device is currently running a scan or if a scan is finished.
- **Memory** - Displays the memory that is available on the device.
- **Last Updated** - Displays the date and time the device was last updated.
- **Previous IP Addresses** - Displays the previous IP addresses of the device.
- **Blocking Policy** - 1 for the **Monitoring and Remediation** group, empty for the **Monitor**

Only group
- **Log Degradation Threshold** - Displays the log degradation threshold of the device, in days.
- **Account** - Displays the account the device belongs to.

To export the contents of the Endpoint Devices table

1. In Barracuda XDR Dashboard, click **Infrastructure** > **Endpoint Devices**.
2. In the Endpoint Devices table, on the right, click **Export Devices**.
