## February 2024 Barracuda MSP App Release Notes

<https://campus.barracuda.com/doc/112166511/>

This article includes the following topics.

- Release Versions
- Upgrading to this Release
- Updates
- Fixes

### Release Versions

---

This release includes the following versions.

- Backend-2024.1
- Backend-2024.2
- MSPUI-2024.1
- MSPUI-2024.2
- Agent-2024.1

### Upgrading to the February 2024 Release

---

The upgrade process for this release is completely automated. There is no action required on your part to upgrade to the latest release.

### Updates

---

This release includes the following updates:

- Ability to see all M365 users for an SMB account instead of just the first 1,000.
- Improved messaging to let Partners know that Email user usage data is based on the prior day.
- UI improvements to better distinguish between parent Partner, child Partner, and SMB accounts as well as which Partner the SMB is associated with.
- All fields that have a built-in character limit, now include messaging to alert the user about

limits before they start typing.

- When viewing billable Email users, Partners now have the ability to filter by billable license or user, instead of just by user.
- License information is now included in the MSP App when selecting an Email product for an SMB.

## Fixes

---

This release includes the following fixes:

- Messaging when deactivating a BBS unit was placeholder text.
- Transferring a serial from one MSP to another failed to grant the new MSP proper the entitlements.
- Products & Services tab for a Partner was loading too slow.
- Partners were unable to view user billing exclusions.
- Correct SMB name was not being displayed for filter results.
- The export usage functionality for Billing Aggregators was not working if they have any cancelled Partners.
- Linked Companies in ConnectWise were showing as unlinked.
- Not all clients were appearing in the ConnectWise Link Account dropdown.
