This article includes the following topics.

- Release Versions
- Upgrading to this Release
- Updates
- Fixes

Release Versions

This release includes the following versions.

Backend-2023.6

Upgrading to this Release

The upgrade process for this release is completely automated. There is no action required on your part to upgrade to the latest release.

Updates

This release includes the following updates:

- The MSP App now retrieves and display domains associated with a tenant being linked via the M365 Connector at the time of initial linking, allowing the MSP to verify the proper account was selected.
- The domain list is also available in the UI after the linking has been completed.

Fixes

This releases includes the following fixes:

No production bug fixes were included with this release.
