# Step 5 - How to Connect Barracuda Networks Devices to the Barracuda Control Server

https://campus.barracuda.com/doc/11796768/

Before configuring the web interface, complete Step 4 - How to Create the Barracuda Control Server Account Administrator.

## Connect Barracuda Devices (Excluding Barracuda Web Application Firewall Version 8.0 and Higher)

Use the following steps to connect Barracuda Networks devices to Barracuda Control Server:

1. Log in to the Barracuda Control Server as the administrator, and go to the **ADVANCED > Cloud Control** page.
2. Enable *Expert Mode* on the product you are connecting by adding the following content to the end of the URL in your browser address bar:
   `&expert=1`
3. In the **ADVANCED > Cloud Control** page, select **Yes** for **Connect to Barracuda Cloud Control**.
4. Enter your Barracuda Control Server account username and password.
5. In the **Barracuda Control Server** field, enter the IP address or hostname of the Barracuda Control Server.
6. In the **Validation Token** field, copy and paste the following text:
   *<validation token>*
7. Click **Save**.

Your Barracuda Networks device should now be connected to the Barracuda Control Server for this account. Refresh the screen to see the device in the tree on the left hand side.

## Connect Barracuda Web Application Firewall Version 8.0 and Higher Devices

---

Use the following steps to connect Barracuda Networks devices to Barracuda Control Server:

1. Log in to the Barracuda Networks product as the administrator, and go to the **ADVANCED > Cloud Control** page.
2. In the **ADVANCED > Cloud Control** page, select **Yes** for **Connect to Barracuda Cloud Control**.
3. In the **Connect using** section, select **Barracuda WAF Control Center**.
4. Enter your Barracuda Control Server account username and password.
5. In the **Barracuda WAF Control Center** field, enter the IP address or hostname of the

Barracuda Control Server.

6. In the **Validation Token** field, copy and paste the following text:
   *<validation token>*
7. Click **Save**.

Your Barracuda Web Application Firewall should now be connected to the Barracuda Control Server for this account. Refresh the screen to see the device in the tree on the left hand side.
