
Product and Firmware Trees

<https://campus.barracuda.com/doc/11796853/>

The Product Tree

Once you connect one or more Barracuda Networks products (devices) to your Barracuda Control Server, the products display as a list in the product tree in the [Cloud Control](#) pane, and are listed by product type under **Products**. If you click [Group Context](#), your Barracuda Networks products are listed by [groups you have defined, or you can create new groups](#).

Click **Cloud Control** above the product tree on the left side of the screen to return to the [Cloud Control context](#).

The Firmware Tree

Click Firmwares in the [Cloud Control](#) left pane, and expand the product tree. Each firmware version displays as a separate folder beneath the device name. Expand the folder to view all devices currently on that firmware version. The [Unit Health Pane](#) indicates whether firmware is the current release or if a new release is available for download.
