Task Manager

https://campus.barracuda.com/doc/11796937/

Use the Task Manager to monitor system tasks. The **ADVANCED > Task Manager** page in the Cloud Control context provides a list of tasks that are in the process of being performed, and displays any errors encountered when performing these tasks. Some of the tasks that the Barracuda Control Server tracks include:

- Configuration restoration
- Connections
- Removal of invalid users

If a task takes a long time to complete, you can click the Cancel link next to the task name and then run the task at a later time when the system is less busy. The Task Errors section lists an error until you manually remove it from the list; errors are not automatically phased out over time.

Troubleshooting

You must log in using the Barracuda Control Server Administrator Account to access the **Troubleshooting** page.
