## MDaemon Messaging Server Deployment

https://campus.barracuda.com/doc/12190600/
This article refers to the Barracuda Message Archiver firmware version 5.0 and higher, and the MDaemon Messaging Server.

Use the following steps to configure an MDaemon Messaging Server to forward a copy of all incoming and outgoing messages to the Barracuda Message Archiver.

1. From the MDaemon menu bar, click the Setup menu, and click Default Domain /

Servers domain:

| Setup |  |
| :--- | :--- |
| Default Domain / Servers... | F2 |
| Extra Domains... | Alt+F2 |
| Web, Sync, \& IM Services... | Ctrl+w |
| Event Scheduling... | Ctrl+E |
| BlackBerry... | Alt+B |
| Preferences... | Ctrl+O |

2. In the Default Domain \& Servers dialog box, click Archiving, and then:

- Select Send copies of all inbound and outbound mail to these addresses and enter the email address of your Barracuda Message Archiver in the associated field, for example, archiver@192.168.200.200[mailto:archiver@192.168.200.200](mailto:archiver@192.168.200.200)
- Select Archive inbound mail
- Select Archive outbound mail
- Select Include local mailing list messages
- Select Include MultiPOP collected messages
- (Optional) Select Insert "(Archive Copy)" into message Subject header

8) Default Domain \& Servers
```
\squareDefaut Domain & Servers
            Domsin
            Delvery
            Servers
            Ports
            ONS
            Timeouts
            Sessions
        Mal Release
        Arctiving
        Pruring
        Unknown Mal
        Domsin Sharing
        Priority Mail
        IP Cache
        Header Translation
    Domain Signatures
    * Public & Shared Folders
| DomainPOP
| RAS
# LDAP
|-Logging
```

$\square$ Send copies of al inbound and ourbound mal to these addesses:
Barracuda Mes5age Archlver IP Addres5
Separate multiple email addresses with a comma character.
Archive to public folders (MD semon PRO only)
$\square$ Archive inbound mail $\square$...archive based on recipient address
$\checkmark$ Archive outbound mal...archive based on sender address
$\square$ Provide separate achives for each MDaemon domain
All mal will be copied into the Mai Archive' toot pubfic folder and sub-folders thereof. By defaul, this folden is orly accessible by the postmaster via IMAP

Mailing litt messages are not archived to public folders.

## $\checkmark$ Include local maing list messages

$\checkmark$ Include MulifOP colected messages
