CommuniGate Pro E-Mail Server Deployment

https://campus.barracuda.com/doc/12191114/

This article refers to the Barracuda Message Archiver version 5.0 and higher, and the CommuniGate Systems CommuniGate Pro E-Mail Server.

The following email rule specifies that a mirrored copy of an email is created for any email in the queue that is not already destined for the Barracuda Message Archiver. This rule prevents looping of mirrored messages.

Use the following steps to set up the email rule,

1. Log into CommuniGate Pro as the Administrator, and in the **E-mail Queue Rules** section, set the following conditions:
    1. **Any Recipient**
    2. **is not**
    3. Enter <*archiver@IP address of your Barracuda Message Archiver*>, for example, enter `archiver@192.168.200.200`
2. Set the action to take is:
    1. **Mirror to**
    2. Enter <*archiver@IP address of your Barracuda Message Archiver*>, for example, enter `archiver@192.168.200.200`

The Barracuda Message Archiver automatically accepts and archives emails sent from CommuniGate Pro to the address <*archiver@IP address of your Barracuda Message Archiver*>.
