

## How to Clear Configuration on the Barracuda Web Application Firewall

<https://campus.barracuda.com/doc/12194792/>

To clear the existing configuration and restore the Barracuda Web Application Firewall to its initial configuration, use the **Clear Configuration** feature available on the **ADVANCED > System Configuration > Configuration Tools** section. This feature clears all system configuration including services, profiles, routes, interfaces etc., but the IP configuration settings on the **BASIC > IP Configuration** page remains intact.

It is recommended to take a back up of existing configuration before performing the **Clear Configuration** operation.
