

## How to Search Barracuda Campus

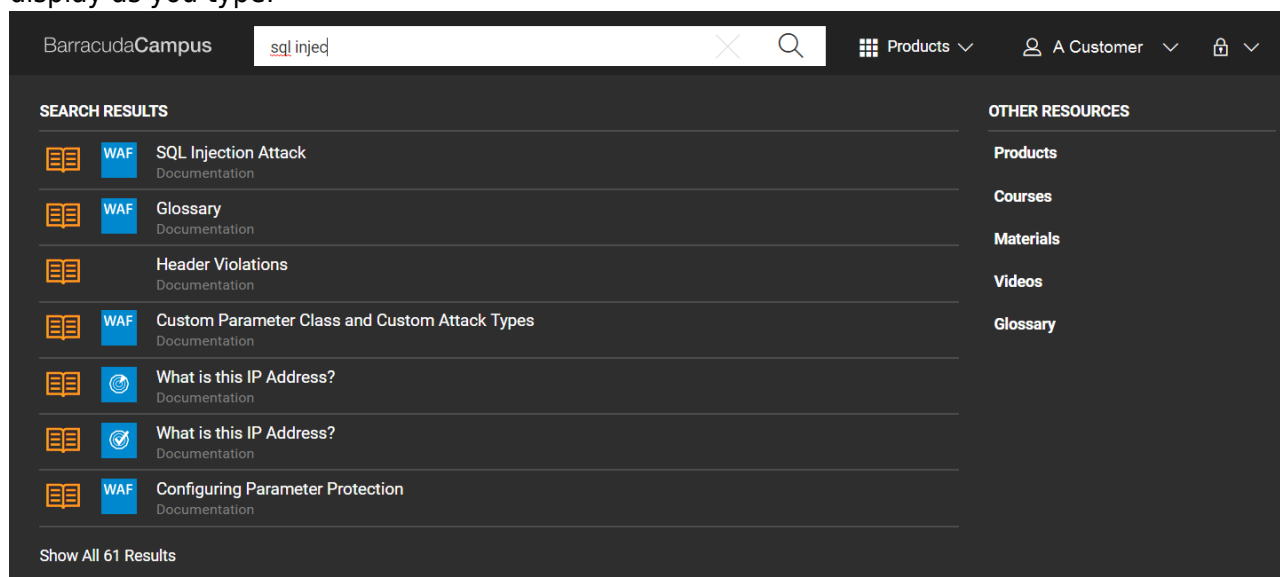

<https://campus.barracuda.com/doc/14713704/>

The search field searches based on context within the Campus.

- **If you are in the dashboard or overview** - searches the entire Campus site.
- **If you are in a product space** - searches within that product space.

### From the Dashboard or Overview

1. From the Dashboard or Overview page, begin typing a term in the search field. Matching items display as you type:

2. Click on an article in the drop-down list to view it, or click the Search Tool (🔍) icon or **Show All <number> Results** link at the bottom of the list to return all matching search results including courses, documentation, and materials:

The screenshot shows the Barracuda Web Application Firewall (WAF) search results page. The header features the WAF logo and navigation links: Overview, Documentation, Training, Certificates, and Materials. Below the header, a search bar is visible. The main content area displays the search results for 'sql inject', showing 25 of 30 results. The first result is 'SQL Injection Attack', which includes a description and a link to the documentation. The second result is 'Glossary', which includes a link to the documentation. The third result is 'Custom Parameter Class and Custom Attack Types', which includes a link to the documentation. On the right side, there is a sidebar with a 'Search Entire Website' button and a 'Narrow by Type' section with links to 'Documentation (29)' and 'Knowledgebase (1)'.
