

How to Configure SSL VPN Network Places

<https://campus.barracuda.com/doc/17333/>

Network places let you use the SSL VPN web interface to connect to an SMB file server in your network. You can upload, download, rename, move, and delete files on the share if you have the required user permissions. To use a network place, you need either CudaLaunch for Android or iOS.

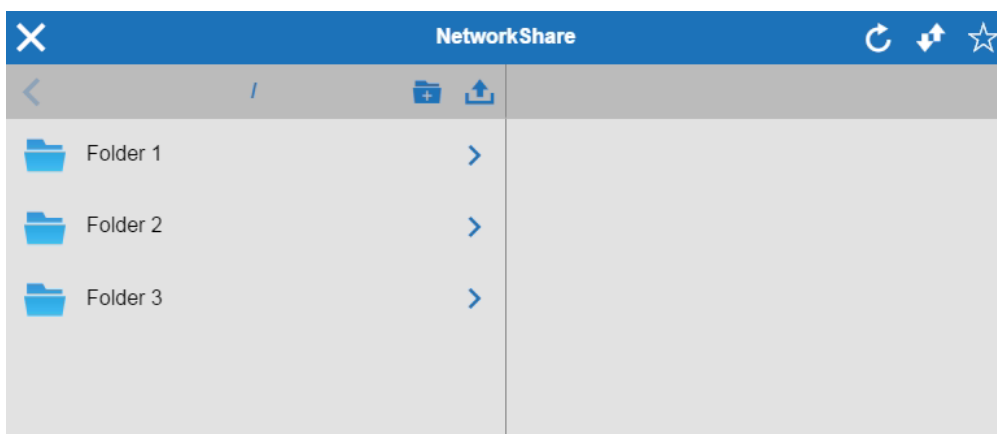

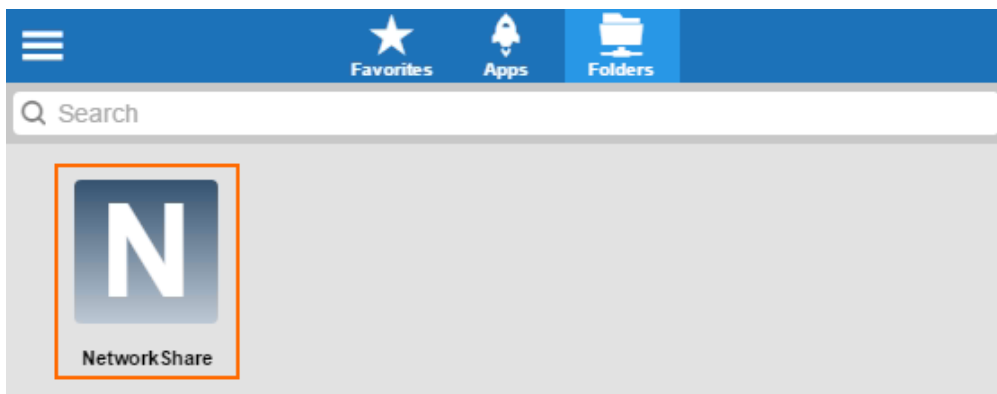

Configure Network Places

1. Go to **CONFIGURATION > Configuration Tree > Box > Assigned Services > VPN-Service > SSL-VPN**.
2. In the left menu, select **Network Places**.
3. Click **Lock**.
4. Click **+** to add a network to the **Network Places** list. The **Network Places** window opens.
5. Enter a **Name** and click **OK**.
6. Enter the **Visible Name**. This is the name used in the web portal and CudaLaunch.
7. From the **File Server Protocol** list, select **SMB**.
8. Enter the hostname, FQDN, or IP address of the **File Server Host**.
9. Enter the **File Server Path**.

10. (optional) Check **Must be Healthy** if the Windows client has to pass a health check before launching the web forward. This setting requires a configured Access Monitor. For more information, see [The Barracuda Access Monitor](#).
11. (optional) To restrict access to the web forward by user group, replace the * entry in the **Allowed User Groups** list. Click **+** to add new user groups.
12. (optional) Click **Ex/Import** to upload a custom icon.
13. (optional) To make this resource available only when enabled by super user groups:
 - Expand the **Configuration Mode** menu on the left, and select **Switch to Advanced View**.
 - Scroll down to the **Dynamic Access** section.
 - Select the **Dynamic App** check box.
 - Allow super user groups to enable, disable, or time-enable the resource.
 - Select the **Allow Maximum/Minimum Time** check boxes and restrict the maximum and minimum amount of time this resource can be time-enabled for.
14. Click **OK**.
15. Click **Send Changes** and **Activate**.

Click the network places app in the web portal to launch the file explorer.
