Understanding HTTP Compression

https://campus.barracuda.com/doc/18449113/

On the **BASIC > Services** page, you can create a compression policy for HTTP, HTTPS, and Instant SSL services and their content rules. In the **Compression** section of the virtual service or content rule settings, you can:

- Enable and disable compression.
- Specify the content types to be compressed.
- Specify the minimum size of objects to be compressed.

For more information on the settings, click the **Help** icon.
