

Audit Log of Configuration Changes

<https://campus.barracuda.com/doc/18449137/>

The **BASIC > Audit Log** page displays updates to the configuration settings of the Barracuda Web Security Gateway in conjunction with [Role-based Administration](#). This log provides the following information:

- Date and time the Barracuda Web Security Gateway processed the operation.
- The name of the user that did the operation.
- The role assigned to the user that did the operation.
- The action performed by the user that did the operation:
 - *add* - Added a value for a field in the configuration.
 - *set* - Set a value for a field in the configuration.
 - *del* - Deleted a value for a field in the configuration.
- The scope, or area of the Barracuda Web Security Gateway affected by the operation:
 - *global* - Applies to global level variables in the configuration.
 - *domain* - Applies to a variable associated with a particular domain.
 - *user* - Applies to a particular Barracuda Web Security Gateway user account.
 - *policy* - Operation was done to a variable for which you can select a **Policy** of either *Authenticated* or *Unauthenticated* users. For example, **BLOCK/ACCEPT > Content Filters**, or **BLOCK/ACCEPT > Applications**.
- Detailed information about the operation.
- Which configuration variable affected by the operation, if any.
- Original value before the operation
- Changed value after the operation.

Log data can be exported to CSV file, and the rate of data streaming to the log can be adjusted.
