

## How to Reload, Restart, and Shut Down the System

<https://campus.barracuda.com/doc/19334000/>

The **System Reload/Shutdown** section on the **BASIC > Administration** page allows you to shutdown, restart, and reload system configuration on the Barracuda Load Balancer ADC.

Shutting down the system powers off the unit. Restarting the system reboots the unit. Reloading the system re-applies the system configuration.

If your Barracuda Load Balancer ADC is equipped with a **RESET** button on the front panel, you can reboot the appliance by pressing it.
