

## Account Creation Controller

<https://campus.barracuda.com/doc/19740/>

|                |              |
|----------------|--------------|
| URI            | /v1/accounts |
| URI Parameters | • n/a        |
| Methods        | POST         |

### POST /v1/accounts

Creates a new account with the given properties. If “subpartner” is passed, the new account is created for this sub-partner.

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
