

Task Messages

Use the following steps to view running and queued tasks in the Barracuda Backup *local web interface*:

1. Open a web browser, and enter the Barracuda Backup Server IP address to log in to the Barracuda Backup *local web interface*.
2. Go to the **System > Device Information** page. In the **Task Manager** section, **Running Tasks** and **Queued Tasks** display:

The screenshot shows the 'Task Manager' section of the Barracuda Backup web interface. It is divided into two main areas: 'Running Tasks' and 'Queued Tasks'.

Running Tasks: This section contains a list of tasks with progress bars and 'Details' links. The tasks are:

- Backup: 8:00pm EDT backup from "Default Backup Schedule (Hyper-V 2012)" (0%)
- Backup: 8:00pm EDT backup from "Default Backup Schedule (Mac Agent)" (0%)
- Backup: 9:00pm EDT backup from "Exchange 2010 Backups" (25%)
- Backup: 6:00am EDT backup from "VMware Backups" (8.33%)
- NetClient: Uploading file part data to the cloud
- NetClient: Uploading file part data to the cloud
- NetClient: Uploading file part data to the cloud
- NetClient: Uploading file part data to the cloud
- NetClient: Uploading health data to the cloud

Below the list, it states: "These tasks are running right now."

Queued Tasks: This section shows "No tasks." and states: "These tasks are waiting to begin running."

3. Click **Details** to toggle additional information on or off.

Processes and Services

The following table describes the processes and services that display on the **System** page:

Backup	Daemon responsible for performing backup functions.
Restore	Daemon responsible for performing restore functions.
Netclient	Process used to replicate data to another location.
Netserver	Process that receives data from netclient for box-to-box replication.
Purger	Deletes files that fall outside of the retention policy, and shares removed from the configuration.
