

How to Use eDirectory with the Barracuda Web Security Service Connector

<https://campus.barracuda.com/doc/21364785/>

These steps will help you to configure the Barracuda Web Security Service Connector to use Novell eDirectory for LDAP authentication with the Barracuda Web Security Service.

1. Browse to <http://login.barracuda.com/> and log in with your [Barracuda Cloud Control Account](#).
2. Select **Web Security**.
3. Browse to the **CONFIGURATION > Gateways** tab.
4. Select the desired Gateway.
5. Set **Enable Local Enforcement Mode** to *Local Enforcement Mode* and click **Save Changes**.
6. From the top of this page, click **Authentication**.
7. Make sure the radio button has *LDAP* selected, and then click on **Add LDAP Authentication Mechanism**.
8. Enter in your LDAP information, and make sure you selected *Novell eDirectory* for **Server Type**.
(Note: You will need to add **x** servers where “x” is the number of replicas you have).
9. Click on **Sync**.
10. Call [Barracuda Networks Technical Support](#) for assistance in applying a patch.
11. Repeat steps 1-7 for any additional Web Security Service Connectors for which you want to configure eDirectory.
