

Monitoring

<https://campus.barracuda.com/doc/2458435/>

The Barracuda SSL VPN incorporates hardware and software fail-safe mechanisms that are indicated via notifications and logs. You can inspect the logs to see what is happening with traffic. SNMP monitoring and traps for the Barracuda SSL VPN model 480 and larger are supported.

The following articles explain the tools and monitoring tasks that you can use to track user numbers and system performance.
