

Viewing System Tasks

<https://campus.barracuda.com/doc/2490372/>

This article refers to [Barracuda Message Archiver Legacy Release](#) firmware or higher .

The **ADVANCED > Task Manager** page provides a list of tasks that are in the process of being performed, and displays any errors encountered when performing these tasks.

The **Running Tasks** section displays firmware download details. If a task takes a long time to complete, you can click the **Cancel** link next to the task name and then run the task at a later time when the system is less busy.

The **Task Errors** section lists an error until you manually remove it from the list; errors are not phased out over time. Any task that results in an error is listed in the **Task Errors** section, with a red Error Summary link to this list present on every page in the web interface as long as there are errors in this list. Click on the **Clear** link to remove errors, since all errors remain in this list until explicitly removed.
