# How to Use Remote Control in Microsoft Edge (Chromium)

https://campus.barracuda.com/doc/25043/

With new installations of Microsoft Edge there is no direct **ClickOnce** support. This is required for beginning **Remote Desktop**, **PuTTy**, and VNC connections within Barracuda RMM.

**To install the required plugin, follow these steps:**

1. Open Edge2. In the **URL field** navigate to https://chrome.google.com/webstore/detail/meta4-clickonce-launcher/jkncabbipkgbconhaajbapbhokpbgkdc.
2. If prompted to allow extensions from other stores, click **Allow extensions from other stores** and **Allow** on the next prompt.

3. Click **Add to Chrome**.
4. Click **Add Extension**.
5. Save and run the executable for the **Meta4 ClickOnce** launcher.
