

How to Deploy the Barracuda Email Protection Add-In

<https://campus.barracuda.com/doc/26807/>

Use the steps in this article to deploy the Barracuda Email Protection Add-In for the Microsoft Outlook client or Outlook on the web.

The Barracuda Email Protection Add-In supports Outlook and Outlook on the web for Microsoft Office 365. The Barracuda Email Protection Add-In will work with an Outlook instance if the following conditions are met:

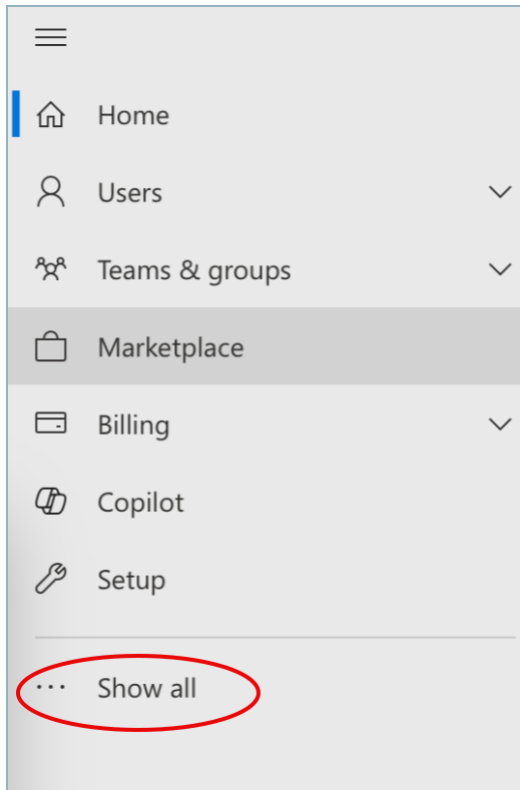

- Users *must* have a Microsoft 365 account to use the Add-In.
- Outlook clients *must* support a minimum API requirement set of 1.8. Therefore, we recommend using the Outlook 2021 client for the best experience. (See [Microsoft Outlook Client Support](#) for more information regarding API requirement sets.)

We rely on Microsoft services that may be incompatible with older Outlook versions. Once Microsoft support for Microsoft 365 services ends for an Outlook version, it may or may not work with the Barracuda Email Protection Add-In.

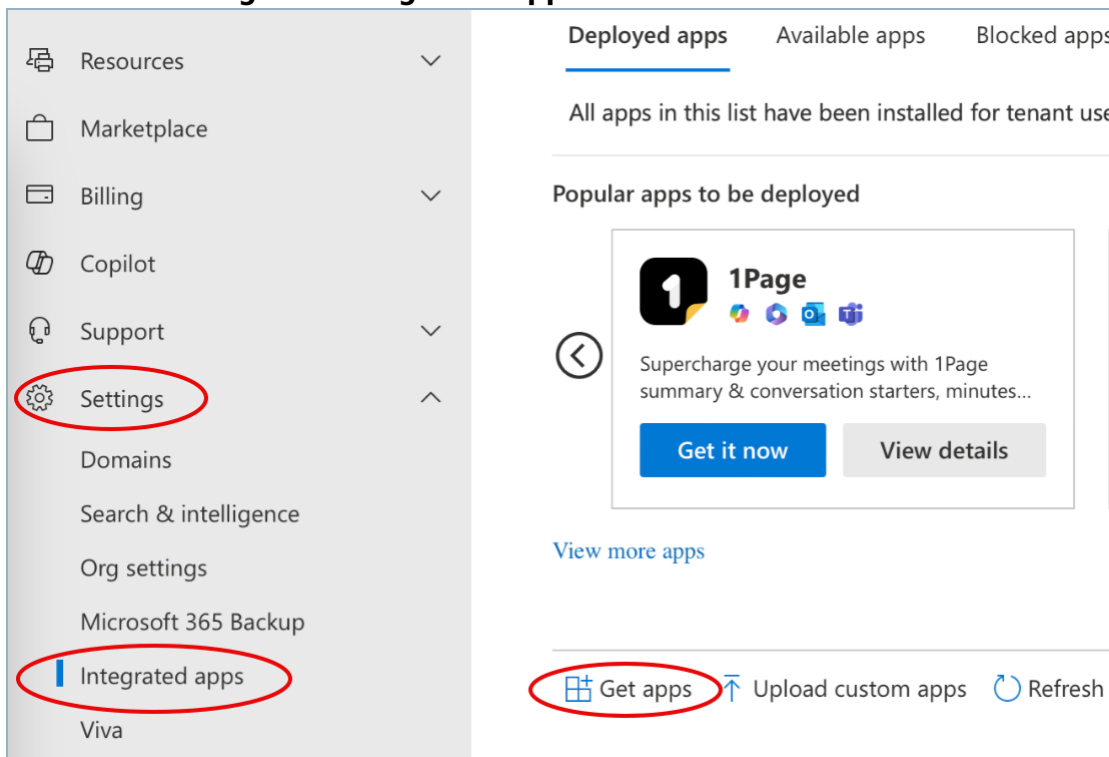

At this time the Add-In is not available for Android or IOS.

Deploying the Barracuda Email Protection Add-In

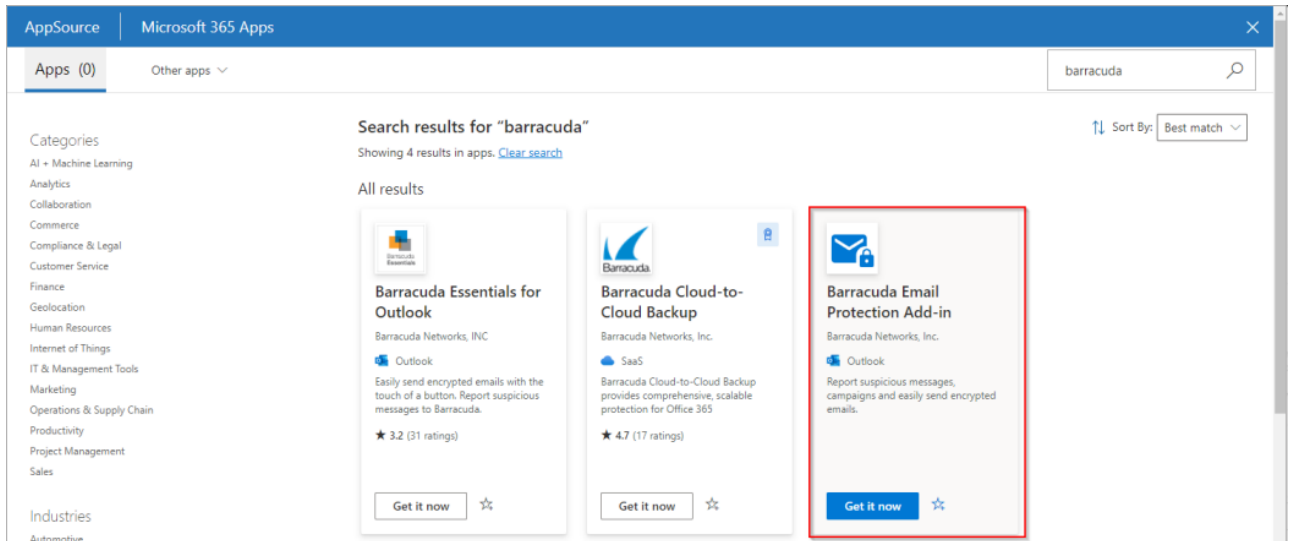

1. Log into the Microsoft 365 Admin Center (admin.microsoft.com).
2. On the left navigation menu, click **Show all**.

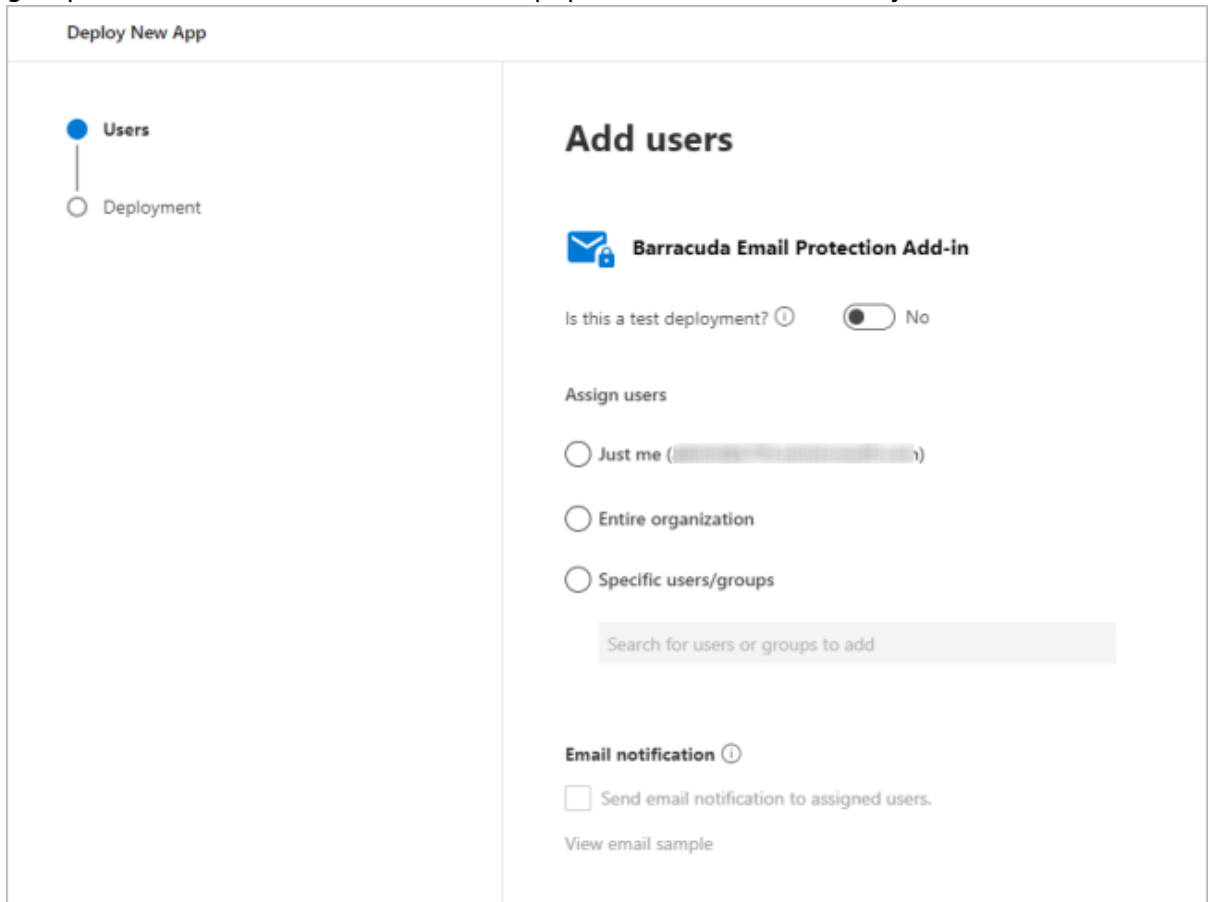

3. Then click **Settings** and **Integrated Apps**.

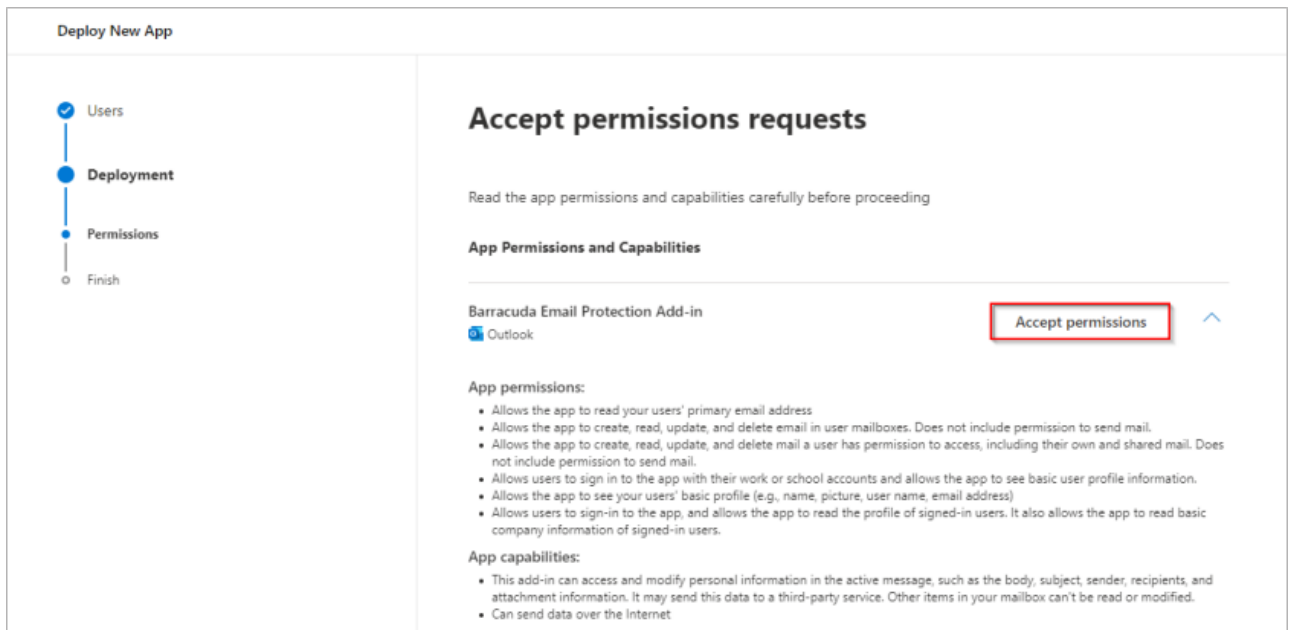

4. Click on **Get apps** and the Microsoft 365 AppSource opens.
5. Search for "Barracuda" to limit the view to only apps from Barracuda Networks.
6. Find the **Barracuda Email Protection Add-In** and click **Get it now**.

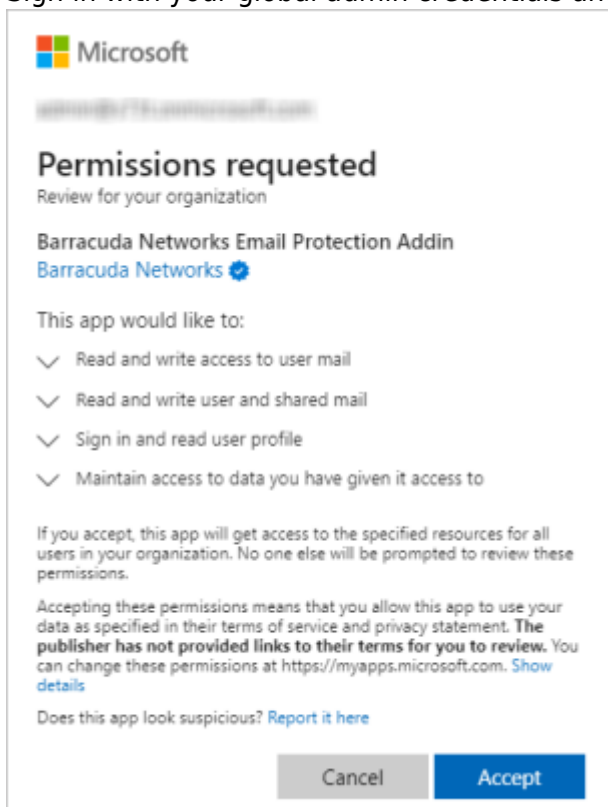

7. A pop up window opens, requiring you to click **Get it now** a second time.
8. The app wizard opens. Choose the users that will receive the app.
 - o **Just me** – Only you, the admin, will be able to see and use the Email Protection Add-In.
 - o **Entire organization** – Everyone in your organization will have access to the app.
 - o **Specific users/groups** – Select the users that will receive access. Start typing a user or group's email address and the field will populate with matches for you to select from.

9. Click **Next**.
10. Click **Accept Permissions** to grant app permissions for the Email Protection Add-In.

11. Sign in with your global admin credentials and click **Accept**.

12. Verify that the permissions were accepted and click **Next**.

Read the app permissions and capabilities carefully before proceeding

App Permissions and Capabilities

Barracuda Email Protection Add-in

 Outlook

✔ Permissions accepted ↗

App permissions:

- Allows the app to read your users' primary email address
- Allows the app to create, read, update, and delete email in user mailboxes. Does not include permission to send mail.
- Allows the app to create, read, update, and delete mail a user has permission to access, including their own and shared mail. Does not include permission to send mail.
- Allows users to sign in to the app with their work or school accounts and allows the app to see basic user profile information.
- Allows the app to see your users' basic profile (e.g., name, picture, user name, email address)
- Allows users to sign-in to the app, and allows the app to read the profile of signed-in users. It also allows the app to read basic company information of signed-in users.

App capabilities:

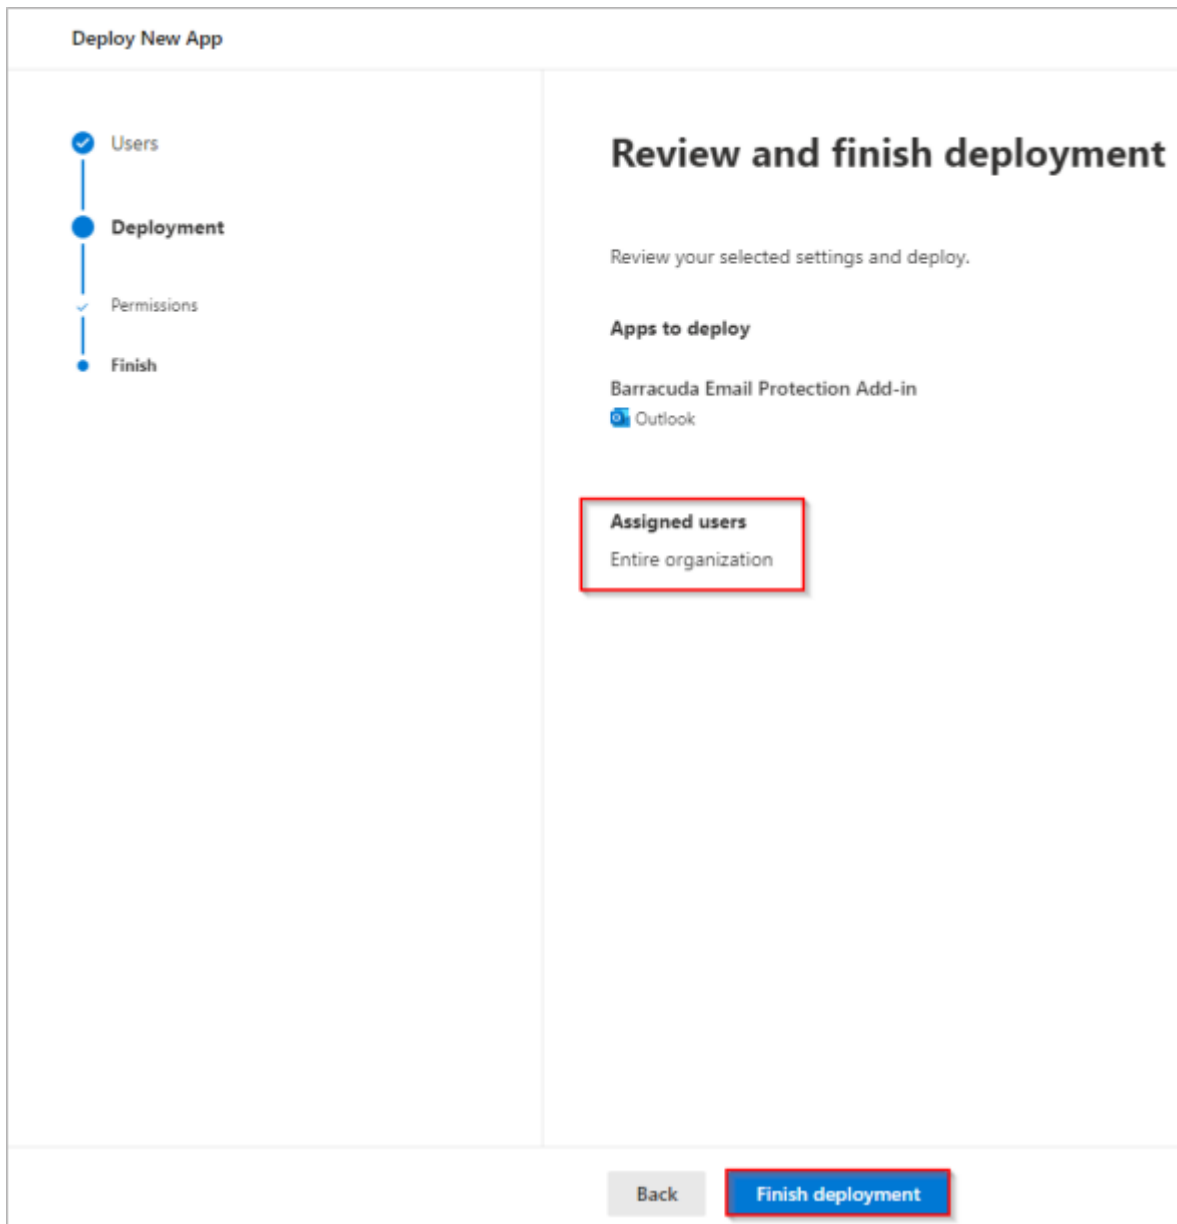

- This add-in can access and modify personal information in the active message, such as the body, subject, sender, recipients, and attachment information. It may send this data to a third-party service. Other items in your mailbox can't be read or modified.
- Can send data over the Internet

Basic info

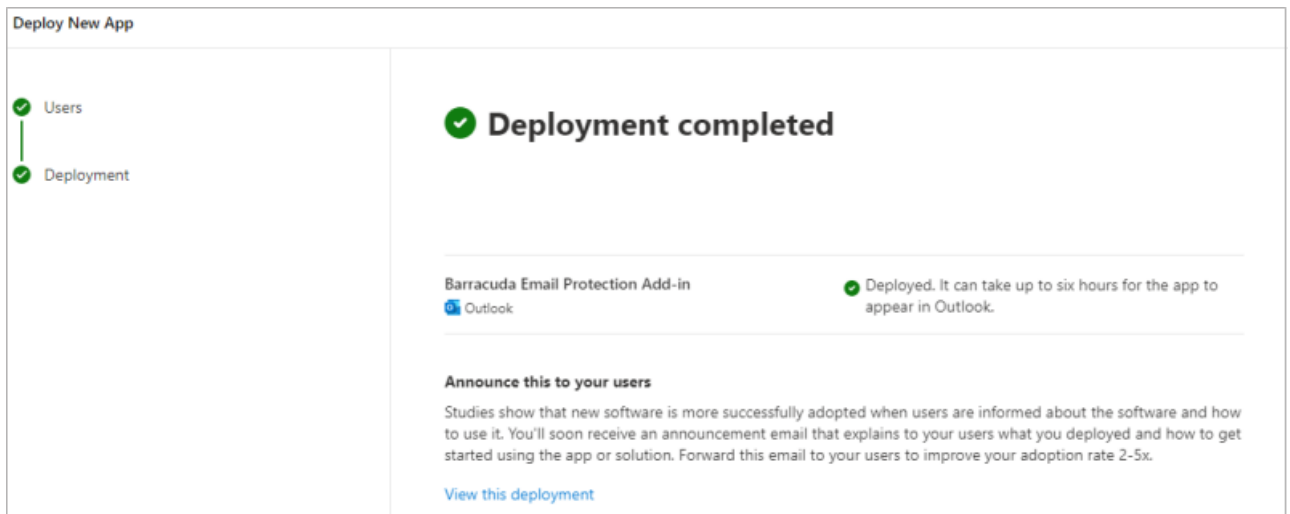

App publisher	App domain
Barracuda Networks, Inc.	https://appssource.microsoft.com/marketplace/apps?product=office

13. Verify the details and click **Finish deployment.**

14. You will see a screen showing that the deployment completed successfully. Note that in some cases, it can take up to 24 hours for the Email Protection Add-In to appear.

15. Verify that the Email Protection Add-In appears in the **Integrated Apps** section.

After the Email Protection Add-In is deployed, you will receive an email from Microsoft. The Add-In is now visible in Outlook and Outlook on the web.

See [Using the Barracuda Email Protection Add-In](#) for more information on how to use the Add-In.

 Microsoft

Congratulations! Barracuda Email Protection Add-in has been successfully deployed.

Hello [Name],

Barracuda Email Protection Add-in is now ready for use.
See instructions below to help you launch your new add-in in Outlook.

 **Barracuda Email Protection Add-in**
Report suspicious messages, campaigns and easily send encrypted emails.

Find your add-in under **Home tab > Get Add-ins > Admin-managed > Barracuda Email Protection Add-in**
