

Upgrading VMware Tools on a Guest Machine

<https://campus.barracuda.com/doc/28885/>

You can upgrade the VMware tools on a guest machine from within the VMware service module. VMware tools must be installed and running on the guest machine; the **Guest Configuration** area of the **Guest Configuration** dashboard includes this information and the link to upgrade VMware tools.

1. In Service Center, click **Status > Service Modules**.
2. Click the **VMware** link.
3. In the **Managed Sites** table, click a site name.
4. In the Managed Hosts table, click a host machine name.
5. Scroll down to the **Guest Summary** table.
6. Click a guest name.
7. Click **View Resource Configuration**.
8. In the **Guest Configuration** area, click **Upgrade VMware Tools**.
