About Configuring DMARC Subdomains for IBU Branding Emails

https://campus.barracuda.com/doc/29745/

If you have DMARC enforcement enabled (p=quarantine or p=reject), configuring a DMARC subdomain for IBU branding emails is required to meet DMARC requirements for SPF alignment.

This configuration:

- provides a location to send bounce-back emails.
- allows Barracuda MSP to update the *header from* and *send from* domains.

See Configuring a DMARC Subdomain for IBU Branding Emails.
