Setting up Avast Business Antivirus Monitoring

https://campus.barracuda.com/doc/30836/

After you have set up your Antivirus policies, you must set up monitoring for Barracuda RMM to begin collecting and alerting on your Avast Business Antivirus environments.

Barracuda RMM includes a monitoring policy called "Avast Business Antivirus" that includes the following monitors:

- **Avast Business Antivirus - Threat Detected**
- **Avast Business Antivirus - Antivirus Definition Files Out of Date**
- **Avast Business Antivirus - Full Antivirus Scan Required**
- **Avast Business Antivirus - Antivirus Protection Disabled**
- **Avast Business Antivirus - Device Restart Required**

You can add this monitoring policy to a service in a service plan, which is then applied to a site or group. As a best practice, it is recommended that you include this monitoring policy in the same service that also includes the Antivirus policies you have set up.

For information on adding a policy to a service, see Creating Service Plans.
