

How to View System Tasks

<https://campus.barracuda.com/doc/3538954/>

The **ADVANCED > Task Manager** page provides a list of tasks that are in the process of being performed and also displays any errors encountered when performing these tasks.

Some of the tasks that the Barracuda Load Balancer tracks include:

- Cluster setup
- Configuration restoration

If a task takes a long time to complete, you can click the **Cancel** link next to the task name and then run the task at a later time when the system is less busy.

The **Task Errors** section lists an error until you manually remove it from the list.
