Getting Started

https://campus.barracuda.com/doc/3866681/

Recommended Steps

Barracuda Networks recommends first reviewing Deployment Options and choosing the best deployment for your network before following these steps to install and configure the Barracuda Email Security Gateway:

The articles linked above cover the entire installation and deployment process. However, if you are installing the Barracuda Email Security Gateway in a server room or other location without access to a web browser, you can also download the Quick Start Guide (shipped with each appliance) as a PDF:

- Barracuda Email Security Gateway Quick Start Guide

Integration with External Systems and Services - Security Considerations

The Barracuda Email Security Gateway integrates with other systems and services in your environment, like your LDAP server and FTP/FTPS or SMB servers. Barracuda Networks recommends creating separate service accounts for these integration points, rather than personal accounts, and then using the principle of least privilege. This integration strategy is part of an overall security policy. For more information, see Security for Integrating with Other Systems - Best Practices.
