

Release Notes Version 7.8.2

<https://campus.barracuda.com/doc/39814778/>

The 7.8.2 release has enhancements and fixes exclusively for the Barracuda Web Application Firewall Vx deployed on Azure and AWS ONLY.

Fixes and Enhancements in 7.8.2

- In the Azure cloud deployment, configuration amongst systems can be synchronized in a active/active cluster of two or more nodes. [BNWF-15475]
- In the Azure cloud deployment, the Virtual IP for services is fixed to the WAN IP address and cannot be changed. [BNWF-15855], [BNWF-15838]
- The Barracuda Web Application Firewall now supports REST based APIs for configuration of Services, Security Policies, Certificates and Clustering. [BNWF-15474]
- The “Allowed API IP/Range”, “Operation Mode”, “Addresses” and “Interface for System Services” modules are not available in the Barracuda Web Application Firewall Vx deployed on Azure and Amazon Web Services. [BNWF-15902], [BNWF-15911]

The REST API guide can be downloaded here: [Barracuda Web Application Firewall REST API Guide](#).
