
Deployment

<https://campus.barracuda.com/doc/39817737/>

The Barracuda Link Balancer can operate in two different modes. Choose an operation mode before installing. The two most common deployment methods are:

- Deployment in front of your firewall - Keep your existing firewall, and insert the Barracuda Link Balancer between your firewall and the Internet.
- Deployment replacing your firewall - Replace your firewall with the Barracuda Link Balancer.

Barracuda Networks recommends that you read the overview section before installation.
