

## Overview

<https://campus.barracuda.com/doc/39822361/>

**As of July 19, 2016, all sales and renewals for Barracuda Phone System (formerly CudaTel) will cease, and the service and support will be discontinued on June 30, 2019.**

Read more about [Barracuda Phone System Discontinued](#).

The Barracuda Phone System is an integrated hardware and software telephone system solution, providing a simple feature-rich system for connecting and managing voice connections established through Internet and traditional phone lines. The system supports pure VoIP (Voice over Internet Protocol) or it can blend VoIP with traditional phone service, such as analog or digital phone connections. Barracuda Phone System allows you to configure and monitor your phone system, route inbound and outbound calls, and manage and record users and phones through an easy to navigate web interface over the Internet.

Depending on the model, the Barracuda Phone System can support hundreds of concurrent calls. The powerful web interface of the Barracuda Phone System allows you to conveniently configure and manage your phone system from any networked computer as soon as the Barracuda Phone System is installed on your network. Manage, route, and monitor phone calls from one central location.

## Gather Information for Deployment

Complete the [Pre-Deployment Information Worksheet](#) to make sure you have all of the information you will need for deployment.

## Where to Start

- [Step 1 - How to Set Up the Barracuda Phone System](#)
- [Step 2 - How to Configure IP Address, Network Settings, and Firewall](#)
- [Step 3 - How to Configure Basic System Settings](#)
