

Call Routing

<https://campus.barracuda.com/doc/39822908/>

The Barracuda Phone System allows local management of calls both incoming from the PSTN (public switched telephone network), or Internet, and outgoing to the PSTN or Internet. The Barracuda Phone System is connected to the Internet (through its LAN/ WAN ports) and optionally to analog or digital phone lines, directing both inbound and outbound calls to the proper route.
