
Mirroring Configuration

<https://campus.barracuda.com/doc/41103688/>

You can mirror multiple Barracuda Message Archivers in order to maximize uptime, to provide data redundancy, and to reduce the possibility of data loss due to system failures. Mirrored Barracuda Message Archivers must be the same model and run the same firmware version, but they need not reside in the same location or network.

Caution

Mirroring is an advanced feature. This feature may not be appropriate for all environments; contact Barracuda Networks Technical Support *before enabling this feature*.
