# Viewing Logs on the Barracuda Load Balancer ADC

https://campus.barracuda.com/doc/41113353/

## System Logs

To view system logs, go to the **ADVANCED > System Logs** page.

## Web Firewall Logs

All web firewall actions and events are logged under Web Firewall Logs. Use these logs to analyze traffic for suspicious activity and tune the web firewall policies.

To view these logs, go to the **BASIC > Web Firewall Logs** page. This log data is obtained from the log database on the Barracuda Load Balancer ADC itself.

> Unit Name, Log Type, and Log ID are not displayed on the **BASIC > Web Firewall Logs** page.

## Access Logs

All web traffic activities are logged under the Access Logs. Use these logs to obtain information about the website traffic and performance.

To view access logs, go to the **BASIC > Access Logs** page.

## Audit Logs

Changes that are initiated by a system administrator on the Barracuda Load Balancer ADC are logged in the Audit Logs.

To view audit logs, go to the **BASIC > Audit Logs** page.

## Network Firewall Logs

The Network Firewall Logs contain information on network traffic that passes through the interfaces (MGMT and configured interfaces) and matches configured network ACL rules.

To view Network Firewall Logs, go to the **NETWORK > Network Firewall Logs** page.
