## Control Tab

<https://campus.barracuda.com/doc/41116036/>

The Barracuda NG Admin **Control** tab provides an overview of all status-relevant, network-relevant, and session-relevant processes and contains the **Box** section that allows the management of tasks affecting the operating system, such as activating network-relevant configuration changes.

### Control Tab Sections

---

The **Control** tab ribbon bar provides access to the following options that can be used for process handling and system actualization:

- **Server** - The **Server** tab lets you control and monitor virtual servers and services that are configured on your Barracuda NG Firewall.
- **Network** - The **Network** tab provides information about your network interfaces and IP addresses. From here you can access network information and routing tables.
- **Resources** - The **Resources** tab provides a detailed view of the processes that are active on your Barracuda NG Firewall and shows system memory, disk usage, and hardware details, if applicable.
- **Licenses** - The **Licenses** tab shows the current license status and provides options for importing and exporting licenses.
- **Box** - The **Box** tab lets you manage key settings for the Barracuda NG Firewall box operation. From here, you can also configure authentication settings, restart the unit, and activate network configuration changes.
- **Sessions** - The **Sessions** tab provides an overview of all sessions that are active on the Barracuda NG Firewall. From here, you can also terminate sessions.
