Active Licenses

In the **Active Licenses** table, all active licenses are listed. In the table, information about each module is organized in the following columns:

- **Name/Module** - Displays the module name.
- **License** - Displays the license number.
- **Expires** - The license expiration date and time.
- **Host ID** - The hardware ID the license is attached to.
- **Status** - The status of the license.

To open the license configuration, click **Edit Licenses**. For more information, see [Licensing](#).

License Values

The **License Values** section displays details for your license, such as your product model, appliance type, serial number, and number of licensed tunnels.

Version Status

In the **Version Status** table, you can view the version, build date, and status of the installed Barracuda Networks software modules. To view more detailed information about an entry, double-click it. In the table, information about each module is organized in the following columns:

- **Module** - Displays the module name.
- **Type** - Displays the type of module.
- **Version** - Displays the version of the module.
- **Status** - Displays the status of the module. Some of the statuses that you may see include:
 - Latest Kernel - The latest NGFW OS compiled kernel.
 - Clean Release - Release Version number/binary match.
 - Dirty Release - Release Version number/binary mismatch.
 - No License Found - No license found for this module.
 - Not Used - This module is not used.
- **Comment** - Any additional comments.

Host IDs

The **Host IDs** section lists the hardware IDs that the node-locked licenses can be attached to.
