

## Users Page

<https://campus.barracuda.com/doc/41116103/>

On the **Users** page, you can view information about authenticated users of the Firewall service. For general information about firewall authentication, see [Firewall Authentication and Guest Access](#). To access the **Users** page, click the **Firewall** tab, expand the upper ribbon bar, and click the **Users** icon.

User	Peer	Origin	Groups	Timeout	VPN Name	VPN Group	X509 Subject	X509 Issuer	X509 Policy	X509 AltName	Policy...	Auth...	Server	Se...	Box	Port Range Start

## Information Display

The **Users** page provides the following information about authenticated users:

- **User** – The login name of the user.
- **Peer** – The IP address that was used to establish the connection.
- **Origin** – The type of connection for authentication:
  - **VPNT** – VPN tunnel
  - **VPNP** – Personal VPN
  - **VPNG** – Group VPN
  - **HTTP** – Via browser
  - **DCCLIENT** – Authentication information received from the DC Agent on the Microsoft Active Directory Server.
  - **TSAGENT** – Authentication information received from the TS Agent on the Microsoft Terminal Server.
  - **PROXY** – The user is authenticated via HTTP proxy service.
- **Groups** – The authentication group that the user is assigned to.
- **Timeout** – The length of time until authentication expires.
- **VPN Name** – The name of the VPN tunnel.
- **VPN Group** – The group policy that the user is assigned to.
- **X509 Details** – Lists the following information about X509 certificates:
  - **X509 Subject** – The subject of the X509 certificate.
  - **X509 Issuer** – The issuer of the X509 certificate.
  - **X509 Policy** – The X509 certificate's policy.
  - **X509 Alt Name** – The alternative name of the certificate.
- **Policy Roles** – The policy roles.

- **Auth Scheme** - The authentication scheme.
- **Server / Service / Box** - The server, service, and box that were used for authentication.
- **Port Range Start / End** - The port range assigned to the user.
