

## How to Use the Barracuda VPN Client

<https://campus.barracuda.com/doc/41116240/>

For more information on the Barracuda VPN and Network Access Client, see [Barracuda VPN / Network Access Clients - Overview](#).

You can connect to a client-to-site VPN with the Barracuda VPN Client.

### Connect with the Barracuda VPN Client

To establish a client-to-site connection using the Barracuda VPN Client:

1. Launch the Barracuda VPN Client.
2. Click **Preferences**.
3. In the **VPN Control** window, double-click **default profile**.
4. Enter the host IP address that you want to connect to.
5. Click **OK** and close the **VPN Control** window.
6. Enter your login credentials and click **Connect**.
7. Click **Yes** and then click **Close**.

### Checking the VPN Connection Status

To view your connection information, click **Status**. You can also check your connectivity status by pinging an internal IP address.
