

## Discovering PST Files

<https://campus.barracuda.com/doc/42042499/>

This article refers to the Barracuda PST Enterprise version 3.1 or higher.

Run the PST Enterprise Client application using the command line given on the website help page to start discovering PST files.

**PST ENTERPRISE™**

PST Enterprise will find PST files on client machines and file servers, display their details on this website, and allow you to configure rules to process them - selectively delete messages or migrate them (move them to the PST owner's mailbox).

On each client machine, run the following command (either directly or, typically, via a login script):

```
\\PSTERASER\PSTEnterpriseClient\PSTEnterpriseClient.exe http://psteraser.lab01.local/PSTEnterprise/PSTManagement.asmx
```

For further information please see the [documentation](#)  
For technical support, please e-mail: [support@c2c.com](mailto:support@c2c.com) or call (+44) 118 951 1211 (UK) or 508-870-2205 (US)  
For information regarding all C2C products visit [www.c2c.com](http://www.c2c.com)

Show this page on startup Close

As PST files are located, the PST Enterprise Client uploads information about each PST file and displays the information in the **Assigned PSTs** and **Unassigned PSTs** tabs depending on the file status.
