
Mobile Portal

<https://campus.barracuda.com/doc/42042720/>

The Barracuda NG SSL VPN mobile portal allows easy access to your organization's web resources (such as MS Outlook Web Access) for mobile devices like smartphones or tablets. When enabled on the Barracuda NG Firewall, users can access the mobile portal by entering the IP address or hostname of the SSL VPN service in the browser of their mobile phone or tablet. When logged into the portal, users can access web and Outlook Web Access resources as well as enable or disable dynamic firewall rules resources. You can limit access to each resource by configuring the Allowed User Groups for the resource.

The Barracuda NG SSL VPN Mobile Interface

The Barracuda NG SSL VPN mobile portal provides a user friendly interface with a service bar where users can launch available web resources that were made accessible by the Barracuda NG Firewall. Users can navigate through the resources and add shortcuts to a favorites list.

For instructions on how to set up the Barracuda NG SSL VPN mobile portal, see [How to Configure the Mobile Portal](#) and [Mobile Portal User Guide](#).

Additional Features

The Barracuda NG SSL VPN mobile portal provides access to dynamic firewall rules and lets you enable and disable the individual dynamic firewall rules on the Barracuda NG Firewall. You can also set for how long the firewall rule is going to be enabled.

For instructions on how to use the Barracuda NG SSL VPN mobile portal, see [Mobile Portal User Guide](#).

Supported Devices

The Barracuda NG SSL VPN mobile portal supports most of commonly used devices, e.g. Apple iOS, Android and Blackberry.

For more information, see Supported Mobile Devices section in [How to Configure the Mobile Portal](#).
