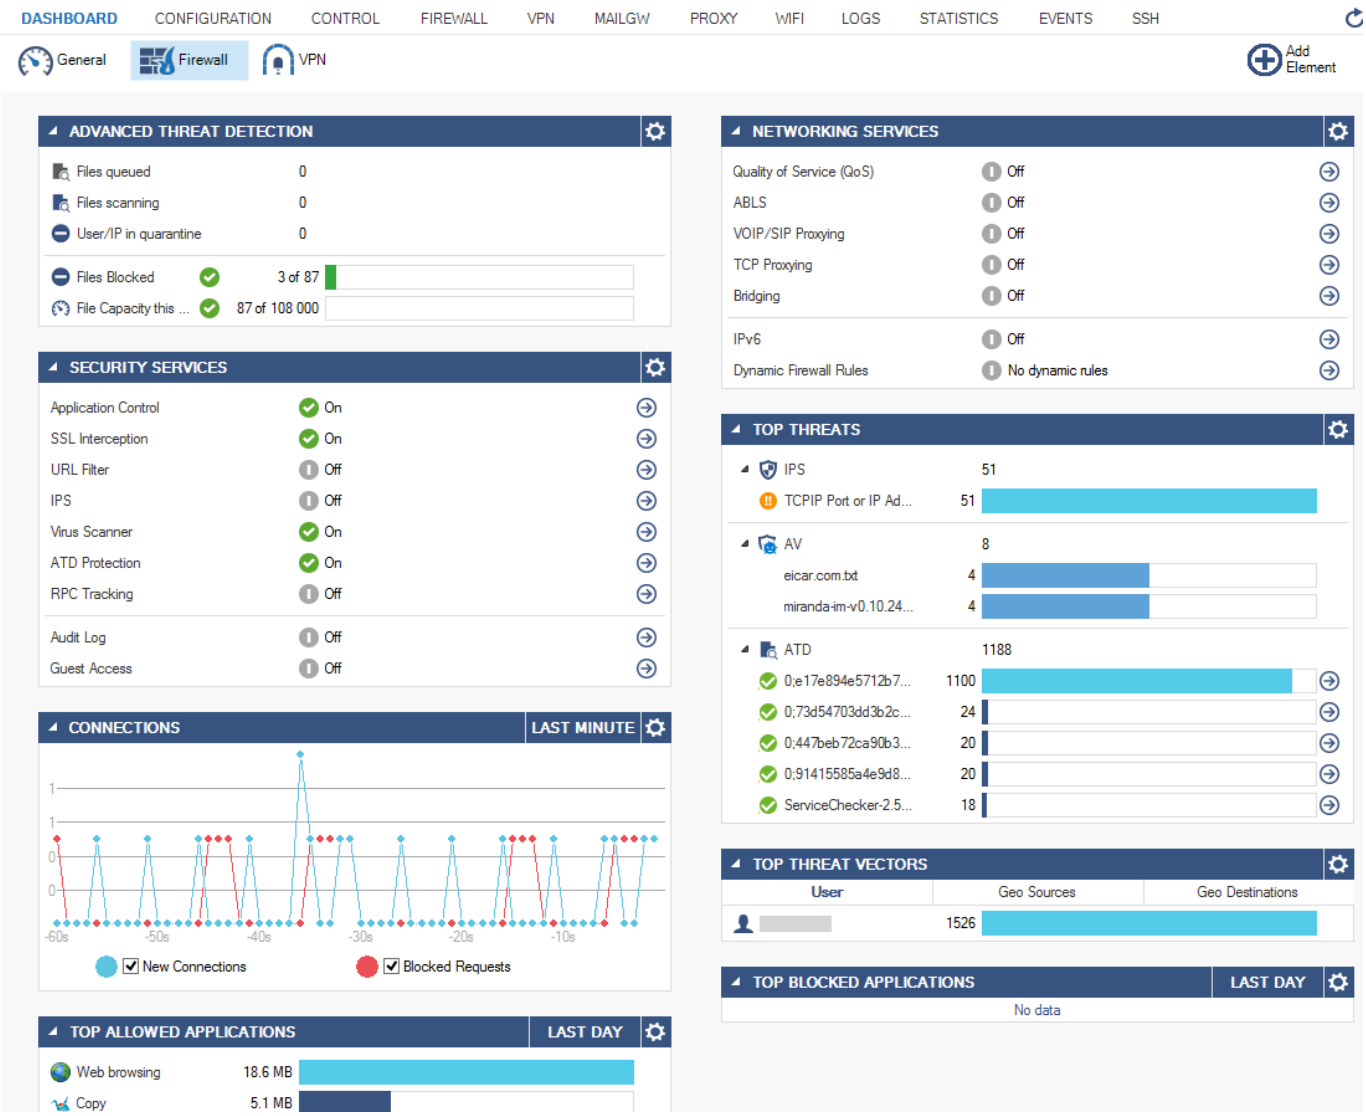
Dashboard Firewall Page

https://campus.barracuda.com/doc/42044603/

The **Dashboard > Firewall** page displays information about the firewall traffic and services related to networking and firewalling. To access the **Firewall** page, click the **Dashboard** tab and select the **Firewall** icon in the ribbon bar.



The elements on the **Firewall** page provide the following information if the features are enabled:

Security Services

This element displays the status (enabled or disabled) of security-related services on the Barracuda

NG Firewall. Click the arrow icon next to a feature to access the configuration. For information on how to enable security services, see How to Enable Application Control 2.0, SSL Interception, URL Filtering, Virus Scanning and ATP.

- **Application Control** – Shows if Application Control 2.0 is enabled on the Barracuda NG Firewall. For more information, see Application Control 2.0.
- **SSL Interception** – Shows if SSL Interception is enabled.
- **URL Filter** – Shows if URL filtering is enabled. For more information, see URL Filter.
- **IPS** – Shows if the Intrusion Prevention System (IPS) is enabled. For more information, see Intrusion Prevention System (IPS).
- **Virus Scanner** – Shows if the Virus Scanner service is enabled. For more information, see Virus Scanner.
- **ATD Protection** – Shows if Advanced Threat Protection (ATP) is enabled. For more information, see Advanced Threat Protection (ATP).
- **RPC Tracking** – Shows if RPC tracking is enabled. For more information, see How to Use the RPC Plugin Module.
- **Audit Log** – Shows if the firewall Audit Log service is enabled. For more information, see How to Enable the Firewall Audit Log Service.
- **Guest Access** – Shows if Guest Access is provided. For more information, see Firewall Authentication and Guest Access.

Networking Services

This element displays the status (enabled or disabled) of networking services. Click the arrow icon next to a feature to access the configuration.

- **Quality of Service (QoS)** – QoS is part of the Barracuda NG Firewall Traffic Shaping feature. For more information, see Traffic Shaping.
- **ABLS** – Shows if application-based provider selection is enabled. For more information, see Application Control 2.0.
- **VOIP/SIP Proxying** – Shows if VoIP/SIP proxying is enabled. For more information, see SIP Proxy.
- **TCP Proxying** – Shows if TCP proxying is enabled. For more information, see General Firewall Configuration.
- **Bridging** – Shows if bridging is enabled. For more information, see Bridging.
- **IPv6** – Shows if IPv6 is enabled and in use. For more information, see How to Use IPv6.
- **Dynamic Firewall Rules** – Shows if dynamic firewall rules are enabled. For more information, see How to Create and Activate a Dynamic Firewall Rule.

Top Threats

This element shows the top threats by number of incidents. Click the arrow icons next to the feature icons to expand the features and display or hide further information details.

- **IPS** – Shows the top threats detected by the Intrusion Prevention System (IPS) if enabled. For more information, see Intrusion Prevention System (IPS).
- **AV** – Shows the top threats detected by the Virus Scanner service if enabled. For more information, see Virus Scanner.
- **ATD** – Shows the top threats detected by Advanced Threat Protection (ATP) if enabled. For more information, see Advanced Threat Protection (ATP).

Top Threat Vectors

This element provides information about users and geo locations providing the top threat vectors.

Advanced Threat Detection

Shows information gathered by Advanced Threat Protection if ATP is enabled. For more information, see Advanced Threat Protection (ATP).

Connections

Shows the number of allowed and blocked connections. Select the checkboxes to toggle the display view.

Top Allowed Applications

This element shows the top allowed applications by data size.

Top Blocked Applications

This element shows the top blocked applications by data size.
