ArchiveOne Service Account Permissions

https://campus.barracuda.com/doc/42048298/

The ArchiveOne Service Account is used by the ArchiveOne Service and ArchiveOne Admin console to connect to Microsoft Exchange. Note that this account must have a mailbox. During installation, the ArchiveOne service account and ArchiveOne users security group are created, however, under certain circumstances, you must manually create the service account.

ArchiveOne Service Account Requirements

The following table lists account requirements:

Requirement	Details
Mail-Enabled NT User in the same domain as Microsoft Exchange	The default account created by the installation is called **ArchiveOneAdmin**.
Microsoft Exchange rights	You must have *Send As* and *Receive As* rights as well as *Administer Store* on Mail and Public Folder Stores. The ArchiveOneUsers group must have *Full Access* permissions on the service account's mailbox.
Member of the local Administrators' security group on the ArchiveOne and Microsoft Exchange servers	
Full Control Share and NTFS security permissions on the Add-ins shared folder	Located on the ArchiveOne server.
Full Control NTFS security permissions over the location where the ArchiveOne repositories are to be stored.	
Logon As Service rights on the ArchiveOne server.
