

## Update the Barracuda Web Application Firewall Firmware

<https://campus.barracuda.com/doc/4259977/>

To update the firmware on the Barracuda Web Application Firewall:

1. Go to the **ADVANCED > Firmware Update** page.
2. Read the release notes to learn about the latest features and updates provided in the new firmware version.
3. Click **Download Now** next to **Latest Early Release(s)**.  
**Download Now** is disabled if the Barracuda Web Application Firewall is already updated with the latest firmware version.
4. Click **OK** in the download duration window.  
Updating the firmware can take several minutes. Do not turn off your appliance during this process. You can view the download status by clicking **Refresh**. A "Firmware downloaded" message displays once the download is complete.
5. Click **Apply Now** after the download completes.
6. Click **OK** when prompted to reboot the Barracuda Web Application Firewall.  
A status page displays the progress of the reboot. Once the reboot is complete, the login page appears.
