

How to Set Up Test Installation

<https://campus.barracuda.com/doc/43222359/>

This article refers to the Barracuda ArchiveOne Enterprise installed in a low volume data environment for testing. Complete [Step 1 - Prepare for Installation](#) before proceeding.

Use the following steps to install ArchiveOne in an environment with low data volume:

1. Choose a system on which to install ArchiveOne; this is referred to as the ArchiveOne server.
2. Create a new mailbox, or choose an existing mailbox to use for testing the archiving and search/retrieval process.
3. Create a directory on the ArchiveOne server to use for repository storage during testing; you must at least 10GB of free disk space. For example, **C:\AOnePol**.
4. Run the installer on the ArchiveOne server.
5. Follow the onscreen instructions to install the **ArchiveOne Service, ArchiveOne Admin, [Search and Retrieval Website](#)**.
6. Choose the **automatic installation** option, and accept all of the default settings.
For Index Base Directory use the value **C:\AOnePol\index**, and for Archive Base Directory use the value **C:\AOnePol\archive**.
