

Controlling Client Settings from ArchiveOne Admin

<https://campus.barracuda.com/doc/43222765/>

You can control various aspects of clients from ArchiveOne Admin. This can be done for all users, or just for selected users. You can see the **client configuration** dialog in one of two ways:

- To view the default values for clients, right-click **Mailbox Manager**, click **Properties**, and then click **Client Configuration** page.
- To view the client configuration for a specific user, expand **Mailbox Manager**, right-click on the user, click **Client Configuration**, and then click to override the global settings.

You can change the following options:

- **Enable Outlook Form registration** – Cause Quick Link to register Outlook forms for the appearance of Message Links.
- **Enable client tracing** – Causes Quick Link to generate trace files .
- **Advanced** – Allows an administrator or [Support](#) to set additional client behavior based on a given name and value.

This is an advanced feature; contact your support representative for more information on using this feature.
