

Store Configuration Page

<https://campus.barracuda.com/doc/43222862/>

Use the **Store Configuration** page to specify whether mailboxes added to the [Mailbox Manager Node](#), or public folders added to the [Public Folder Manager](#), are enabled for processing by default, and to specify the default repository when adding mailboxes and public folders.

You may be limited by your license in the number of mailboxes or public folders you can enable. To add a group of mailboxes but only enable a select set of mailboxes, turn off the option on this page, in order to add them disabled, and then enable selected mailboxes.
