

Database Page

<https://campus.barracuda.com/doc/43222881/>

Use the **Database** page to specify whether Policy results are to be written to a database, and if so, how to access it. Click **Browse** to define the connection; only Access and SQL Server are supported. The Access database will be created but the SQL Server one must exist. In both cases, all required tables are created in the database. See [Database Tables](#) for more information.
